

Cook Inlet Beluga Whale Management, Research and Partnership

Friday, January 28, 2022
1:00 – 4:00 pm Alaska Time

- Did you know that there is a multi-stakeholder Task Force co-led by NOAA Fisheries and the Alaska Department of Fish and Game focused on Cook Inlet beluga recovery?
- Do you wonder what happens to the information collected from Cook Inlet beluga strandings or to the photos of Cook Inlet belugas that volunteers and partners share with NOAA Fisheries, and/or the Cook Inlet Beluga Whale Photo-ID project?
- Do you want to learn more about ongoing research NOAA Fisheries, ADF&G, and partners are conducting to help recover Cook Inlet belugas?

The Cook Inlet Beluga Whale Recovery Implementation Task Force is holding a public session to increase awareness about Cook Inlet beluga recovery work and to provide an opportunity for the public to learn about ongoing research and conservation

Come learn about the goals and structure of the Task Force as well as its recent accomplishments. Then hear from researchers about ongoing work with stranded belugas, photo-identification, aerial surveys, and acoustic monitoring.
